New Catalogue App from Gates Saves Time, Adds Value

The new, free app for mobile phones and tablets makes the Gates Automotive Catalogue even more accessible

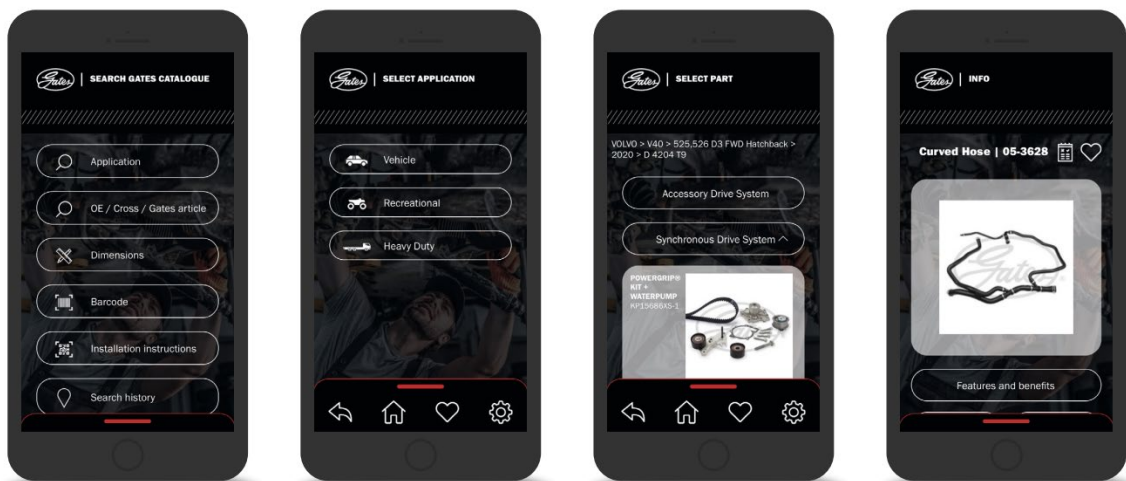

LUXEMBURG, Feb. 17, 2020 — Gates (NYSE: GTES), a leading global provider of application-specific fluid power and power transmission solutions, introduces a new mobile app that provides users quick access to one of the automotive aftermarket's most comprehensive product ranges. Now available for download, the Gates Automotive Catalogue App adapts the flexibility provided by smartphone and tablet operating systems to create a simple, fast and flexible tool.

Offering an improved user experience, the Gates Automotive Catalogue App delivers enhanced features and service levels not available via desktop or mobile browsers, including:

- **A Barcode Scanner:** By scanning the barcode on Gates' product boxes, users have instant access to part images, application data, Tech Tips and Technical Bulletins, providing numerous time-saving benefits for installers and distributors.
- **Additional Search Functionality:** Users can search belt, pulley and hose sizes and characteristics, no matter the application.
- **Select and Compare Tool:** Users now have the ability to list and compare similar products and kits side-by-side to make more informed selections.
- **Automatic Search Log History:** The app automatically saves recent search history, allowing users quick and easy access to data and reminders for their most popular models.

"The new Gates Automotive Catalogue App adds another level of service for our customers," said Sam De Win, Gates technical support & data manager Automotive Replacement, EMEA. "The enhanced features and tools deliver significant benefits to the end user; making it likely to become a firm favourite with both counter staff and mechanics on the workshop floor."

Download the Gates Automotive Catalogue App in the iOS App Store or Android Playstore for free today.

About Gates

Gates is a global manufacturer of innovative, highly engineered power transmission and fluid power solutions. Gates offers a broad portfolio of products to diverse replacement channel customers and to original equipment ("first-fit") manufacturers as specified components. Gates participates in many sectors of the industrial and consumer markets. Gates products play essential roles in a diverse range of applications across a wide variety of end markets ranging from harsh and hazardous industries such as agriculture, construction, manufacturing and energy, to everyday consumer applications such as printers, power washers, automatic doors and vacuum cleaners, and virtually every form of transportation. Gates products are sold in 128 countries across four commercial regions: the Americas; Europe, Middle East and Africa; Greater China; and East Asia and India. More about Gates can be found at www.gates.com.
